13 JUNE 2025 | WORKSHOPS LAYOUT REV 01

26 JUNE 2025 REV 02

09 JULY 2025 REV 03

DEVIATIONS RECORDED

1. Workshop departments are split between two different floors and blocks. Clinical Engineering on Level 1 with close proximity to lift shaft in relation to delivery yard.
2. Receiving and Dispatch rooms are split between both Maintenance and Clinical Engineering.
3. Staff facilities are split between both departments, Clinical Engineering only require kitchenette and staff facilities for max 2 people.
4. Clinical Engineering to have security at the entrance – variation from brief/IUSS.
5. Total amount of circulation increased due to departments arranging themselves on two separate floors and Blocks.
6. Space variation due to site constraints around service yard, diesel storage tank.

NEW BELHAR REGIONAL HOSPITAL DESIGN | 201 EMERGENCY CENTRE

13 JUNE 2025 ISSUE DATE | MAINTANANCE WORKSHOPS LAYOUT REV 01
APPENDIX 01 | CLIENT FEEDBACK | ROUND 01 | ROUND 02

Round 1 Client Feedback

Workshops - Maintenance

Workshops have no natural light or ventilation. Prefer a configuration with a central corridor instead of a wraparound would be preferred and save wasted circulation sq.

Workshops - Clinical Engineering

Better outlook of space to northern façade.
All four spaces in line.
Staff facilities to be accommodated within area.
Security to be a manned desk, minimum area required.

Round 2 Client Feedback

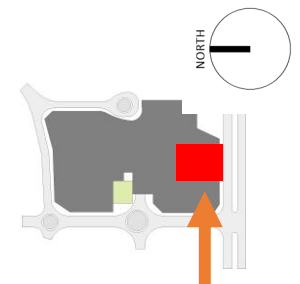

Workshops - Maintenance

No comment, ready to present to WCHDW as is. Rev 02.

Workshops - Clinical Engineering

I have requested clarity from WCHDW on workshop 2, and to confirm that the intention is to re-configure the layout that the unit has a 'front door' off the common circulation passage, and workshop 2 should therefore also not be accessed off the common circulation passage.

I had envisaged you can walk thru the centre of workshop 1 to get to workshop 2. Just feel we need a 'front door' to the whole unit and not sharing a passage etc
